Definitions							
Testing Standard:	Identifies the set of standards/guidelines which the voting system is being tested against. Currently, voting systems may only be submitted for testing to the 2005 Voluntary Voting System Guidelines (2005 VVSG). Systems submitted for testing prior to December 15, 2007, also had the option of being tested against the 2002 Voting System Standards (2002 VSS).						
VSTL:	Accredited EAC voting system test laboratory (VSTL) selected by the manufacturer to perform testing and other laboratory actions consistent with the EAC's Certification Program Manual.						
Testing Application:	Date on which the manufacturer submitted the voting system's application for certification testing. It does not indicate the date on which the application package was approved by the EAC.						
Test Plan:	Document created prior to testing that outlines the scope and nature of testing, items to be tested, test approach, resources needed to perform testing, test tasks, risks and schedule.						
Test Report:	Document that provides the results of a voting system's testing conducted by an EAC accredited VSTL, along with the VSTL's recommendation regarding certification.
